A 38-year-old Sheboygan man was fatally injured Monday morning in an industrial accident at Willman Industries in Cedar Grove.

Lemuel Aguirre, 605 S. 25th St., died about 7 a.m.

According to the Sheboygan County Sheriff's Department, Aguirre sustained "a fatal compression head injury."

The injury was caused by a shell core machine, officials said.

The accident is being investigated by the Occupational Safety and Health Administration.

"It's a terrible tragedy," Willman president Chris Atkin said. "I can't say anything more than that."

The Cedar Grove First Responders were at the scene, but Aguirre was dead when they arrived.

Fire Chief Greg Navis said this is the first accident he can recall at the foundry.

"We've been called for medical issues, but not for injuries," Navis said. "They've been pretty much accident free."
